

Invitation to International Christian Pfeiffer Seminar
in Beckum, Germany
to be held from 17th – 20th September 2018

We are proud inviting you to our annual Christian Pfeiffer Grinding Seminar. Whether you are looking to reduce energy cost, increase output or improve product quality of existing mills, or selecting a new grinding plant, this seminar will provide you with practical answers from a company with vast amount of knowledge and data accumulated over 90 years in the field of grinding and separating. Participants will have the opportunity to not only learn but also personally exchange experience with Christian Pfeiffer experts, invited speakers and fellow delegates in a relaxed and small group environment.

Specially designed for Plant Managers, Technical, Production and Maintenance Managers or Engineers, responsible for operating and/or maintaining grinding plants and equipment, this intensive 4-day Christian Pfeiffer Seminar will offer you the opportunity to enhance your knowledge about grinding and separating processes and their optimisation in theory and practice.

You or your staff will profit from the vast experience of our experts, learn about the latest progress in the field of cement grinding and get lots of solution approaches relevant for your scope of responsibility - no matter whether it concerns the increase of production rate, the improvement of product quality or the reduction of energy consumption. Besides you will have the opportunity to personally exchange your experiences with our experts.

Example: Visit of a German cement plant operating with Christian Pfeiffer equipment

Have a look at our preliminary Seminar programme:

Theory:

- An overview of the grinding processes,
- Comparative cost of ownership of the different grinding systems,
- Latest design of ball mill and the internals,
- Latest design of high efficiency separators,
- Mill audit and axial sampling,
- Impact of material characteristics & grindability,
- Cement additives,
- Influence of the grinding process on cement quality

Practice:

- Workshop: Modernisation of existing equipment,
- Workshop: Plant performance (mill operation & improvement),
- Maintenance consideration & best practices,
- Visit of one German Cement Plant in operation

Seminar Fee: 2,980 EUR net

The Seminar fee includes the hotel accommodation, 2-way transfer from Düsseldorf, Cologne or Frankfurt airport to the hotel as well as any other local transport, food and beverages as well as an electronic copy of the seminar material. Please register early, as places are limited and will be confirmed on a first-come, first-served basis, by filling in the attached form and send it via fax: +49 2521 849-123 or email it to:
